DON'T FALL ASLEEP

You just don't know where you might wake up!

LEE IS HAVING A RESTLESS NIGHT,

...sure he's fast asleep, but that won't stop him taking one of his nocturnal journeys! Fortunately, our sleepwalker has a courageous canine companion who will try his utmost to protect his master from coming to any harm - Lee's faithful mutt, Ralph.

Lee's four legged friend is zapped, bashed, clobbered, pummeled, singed and squashed, but nothing will stop him from performing his dedicated duty, (although the odd fire hydrant may distract him)... it's all par for the course of a night errand.

These midnight meanderings take him to the most hazardous of places... the creepy graveyard, the gooky zoo, precarious construction sites and the traffic strewn city streets, but Lee's loyal rover steadfastly guards his master from all impending dangers - with painful consequences!

Featuring sound effects, including speech created by **LENNY HENRY**, and superb cartoon style animation.

*"This is the best game

COMPUTER GAME REVIEW

1999. You are in control of XCom; charged by the world's leaders to strike at the alien menace that's terrorising the Earth.

At first, you'll scan, track and shoot down the slower UFOs, but that will just be the beginning. Whenever a UFO crashes, or lands, you must be there; leading a squad of armed soldiers from building to building, from street to street, using all your tactical skills to capture or destroy the aliens.

If you succeed in your first missions, your scientists and engineers will copy the alien technology to create more powerful weapons and craft for your forces to use. Gradually, you'll build up a terrifying picture of this Unknown Enemy, and their real aims and desires, then you'll have to work out a strategy to stop them.

One thing is certain - it won't be easy!

"It's more than a straight flight sim.; D.I.D. have emulated multi-million dollar flight simulators. When you play TFX the first thing that hits you is the detail of the landscape... over seven million square km appears on screen, with hills, roads and mountains all in the right place." THE EDGE

"The graphic detail is quite superb, with stunning visuals and strong sense of image, TFX is quite often like watching a movie... when I first saw TFX my jaw dropped so far it took me 15 minutes to find it again! It's fast, good looking and fun." PC REVIEW

THE AMIGA CD³²

THE WORLDS FIRST 32-BIT GAMES CONSOLE

32-BIT!

Inside any games console is a CPU (a central processor), which is responsible for the majority of the intense calculations needed when playing games. The CD32 has a 32-bit CPU, rather than an old style 16-bit CPU, as used in Sega and Nintendo consoles. This 32-bit CPU is capable of playing far superior games to 16-bit CPUs, because it can transfer twice as much information in the same amount of time. Therefore, the CD32 is capable of playing games that would be technically impossible on 16-bit consoles.

WATCH FILMS

Soon films will be available on CD in a standard called 'Video CD'. The Amiga CD32 features a dual speed drive which, with a special adaptor (available late 93), can play these films. Because CD32 is digital, pictures are reproduced in perfect quality, with freeze frame shots looking like still photographs, not the fuzzy images created when you pause a video tape. And, unlike tapes which need to be wound backwards and forwards to find pictures, films on CD can be accessed immediately at the point you wish to view. No time delay and no wear and tear on tapes or mechanisms.

PLAY GAMES

With considerably more space to fill (600 floppy disks per CD), with sound, graphics and gameplay, games on CD can be much more sophisticated. With its unique double speed drive and adaptor, real video shots occupying the full screen can be incorporated into games. To ensure you get the very best from CD games, some manufacturers have already spent over £1,000,000 developing a single title!

LISTEN TO MUSIC

CD32 will accept any standard music CD or CD+G (compact disc with graphics). So, you can use it to play your favourite hits, just like a standard CD player.

READY FOR THE FUTURE

You can be sure that Commodore mean business with the CD32. They took time to develop their Amiga systems, and launched them when the competition was well established. Now the Amiga is the best selling home computer in the UK. At a time when Commodore are launching the Amiga CD32, SEGA already has the Mega CD. But, the development of the CD32 has been meticulous and sure, to produce the world's first 32-bit games console with advanced features, superior power and performance. Check out the chart to the right and decide for yourself.
